## EDUCATION

**New York University** — NYC, United States
*Ph.D. - Computer Science and Technology* — *Sep. 2024 - ???*
Advisor: Prof. Robert Krueger

**Shandong University** — Shandong, China
*Mater of Technology - Computer Science and Technology* — *Sep. 2021 - Jun. 2024*
Advisor: Prof. Yunhai Wang
**Courses:** Human-Computer Interaction, Interactive Data Analysis System, Artificial Intelligence, Machine Learning

**Jiangsu University of Science and Technology** — Jiangsu, China
*Bachelor of Technology - Computer Science and Technology* — *Sep. 2017 - Jun. 2021*
**GPA: Official: 3.85; Major: 3.95; Ranking: 2/102**
**Courses:** Operating Systems, Data Structures, Analysis Of Algorithms, Computer Graphics, Networking, Databases

## PUBLICATIONS

[P1] **Yuancheng Shen**, Yue Zhao, Yunhai Wang, Tong Ge, Haoyan Shi and Bongshin Lee. (2024). Authoring Data-Driven Chart Animations through Direct Manipulation. In *IEEE Transactions on Visualization and Computer Graphics.* (DOI: 10.1109/TVCG.2024.3491504).**[Link]**

## RESEARCH EXPERIENCE

**Pen-Touch Selector: Selecting Elements in SVG Charts** — Shandong University
*Student Leader |Advisor: Yunhai Wang* — *Jan 2024 - July 2024*
- **Description**: The research concentrates on a touchscreen-based SVG selection system with advanced modeling for accurate element selection and interactive recommendations in complex data charts.
- **Contribution**: Proposed innovative ideas and models for distinguishing lasso and tracing methods, ensuring precise identification of selected elements for each method; Implemented interactive user feedback to handle uncertain selections, allowing users to make their choices.

**SwinVision: detecting small objects in low-light environments** — Shandong University
*Collaborator |Advisor: Shang Gao* — *Jan 2024 - Sep 2024*
- **Description**: The research focuses on a Swin Transformer-based framework for small object detection, integrating feature enhancement and specialized modules to improve accuracy and efficiency in low-light environments.
- **Contribution**: Proposed innovative ideas and models for enhancing small object detection in low-light environments, ensuring a balanced approach between accuracy and efficiency; Contributed extensively to writing and refining the manuscript, with the majority of the content authored by me

**Authoring Data-Driven Chart Animations through Direct Manipulation [P1][Link]** — Shandong University
*Student Leader |Advisor: Yunhai Wang and Bongshin Lee* — *Oct 2023 - Jun 2024*
- **Description**: The research concentrates on an intuitive tool that empowers users without programming skills to author expressive chart animations through visual language, interactive editing, and smart recommendation strategies.
- **Contribution**: Researched data animation syntax and tools; Proposed and implemented innovative ideas in consultation with two advisors; Took responsibility for paper writing and illustrations.
- **Achievement**: Developed an interactive tool based on Canis syntax, enabling users to author data-driven chart animations with ease; Written a research paper.

**Anomaly Detection for Network Device Configuration [P3][Link]** — Shandong University
*Student Leader |Advisor: Yunhai Wang* — *Sep 2021 - May 2022*
- **Description**: The research concentrates on configuration anomaly detection using over 10,000 configuration files from five manufacturers.
- **Exploration**: Conducted an in-depth exploration of anomalies in document syntactic structure using big data analysis and statistical methods and offered comprehensive solutions.
- **Solution**: Pioneered the development of configuration statement trees and applied clustering analysis to detect rare anomaly patterns, enabling automated detection as a substitute for manual inspection.
- **Achievement**: Achieved exceptional 85%+ accuracy in anomaly detection with the aid of anomaly samples and gave the modifications methods; Written a research paper and applied for a patent.

## Selected Honors and Awards

- Outstanding Thesis Award, Shandong University *Jun, 2024*
- Outstanding Graduates Award, Shandong University *Jun, 2024*
- Postgraduate Excellent Student Award Fund, Shandong University *Oct, 2021*
- Outstanding Thesis Award, Jiangsu University of Science and Technology *Jun, 2021*
- Outstanding Graduates Award, Jiangsu University of Science and Technology *Jun, 2021*
- 1st Prize Scholarship, Jiangsu University of Science and Technology *Oct, 2019*
- 1st Prize in Higher Mathematics Competition, Jiangsu *Aug, 2018*

## Academic Engagements

- **International Conference on Geometric Modeling and Processing** Qingdao, China
  *Participated in the event, received experts and scholars, and volunteered for other conference services* *Jun 2024*

- **The Geometric Design and Computing Conference** Qingdao, China
  *Participated in the event, received experts and scholars, and volunteered for other conference services* *Aug 2022*

- **The China Visualization and Visual Analytics Conference** Xining, China
  *Participated in the event* *Jul 2022*

## Skills

- **Tools:** TypeScript, JavaScript, NodeJs, Python, SQL, C++, R, Latex, Adobe Illustrator, PhotoShop
- **Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management
